A Strong Science Student Turns Her Focus toward Public Policy

S

Senior Samantha Chen was a science major at The College of New Jersey before transferring to Rutgers University. She is now in the School of Arts and Sciences. "I've always been interested in science, but I truly believe the social sciences have such a big impact on the world," she says. "I want to be able to make a difference, and I want to be able to do so in a way that is meaningful.

Chen has always been interested in social sciences, but she also knew that she wanted to pursue a career in science. "I've always been interested in science, but I truly believe the social sciences have such a big impact on the world," she says. "I want to be able to make a difference, and I want to be able to do so in a way that is meaningful.

Chen joined the School of Arts and Sciences in 2015, and has been working on her thesis since last year. "I've been working on my thesis for a year and a half now," she says. "I'm going to be writing about the role of the social sciences in shaping public policy.

Chen is also involved in several campus organizations, including the Rutgers Science and Society Association and the Rutgers Student Government. "I've been involved in these organizations for a year and a half now," she says. "I've been involved in these organizations for a year and a half now. They've been really important to me, and I've learned a lot from them.

Chen is also interested in social justice, and she hopes to use her knowledge to make a difference in the world. "I've always been interested in social justice, and I want to use my knowledge to make a difference in the world," she says. "I want to be able to help people, and I want to be able to do so in a way that is meaningful.

Chen is also interested in science, and she hopes to use her knowledge to make a difference in the world. "I've always been interested in science, and I want to use my knowledge to make a difference in the world," she says. "I want to be able to help people, and I want to be able to do so in a way that is meaningful.
